Viewing Problems for PDF Documents Using Internet Explorer 6.0 or Windows XP Operating System

Summary:	 The following software may have problems viewing PDF documents: Microsoft Internet Explorer (IE) 6.0 Microsoft XP Operating System
Solution:	To view PDF documents using the above software, you should change the settings in Adobe Acrobat software (Reader or Writer).
Step 1:	From the Adobe menu bar, select "Edit >> Preferences". The 'preferences' window will open. (figure 1)
Step 2:	From the 'Preferences' window, select the ' Internet " option. Uncheck the boxes: "Display PDF in Browser" and "Allow Fast Web View" and click the 'OK' button to accept the changes. (figure 2)
